

1. Download and Install Joomla 3.4

Once Joomla is up and running on the server.

2. Click on Extension Manager under **Extensions**.

3. On the Next page click on the **Upload Package File** tab.

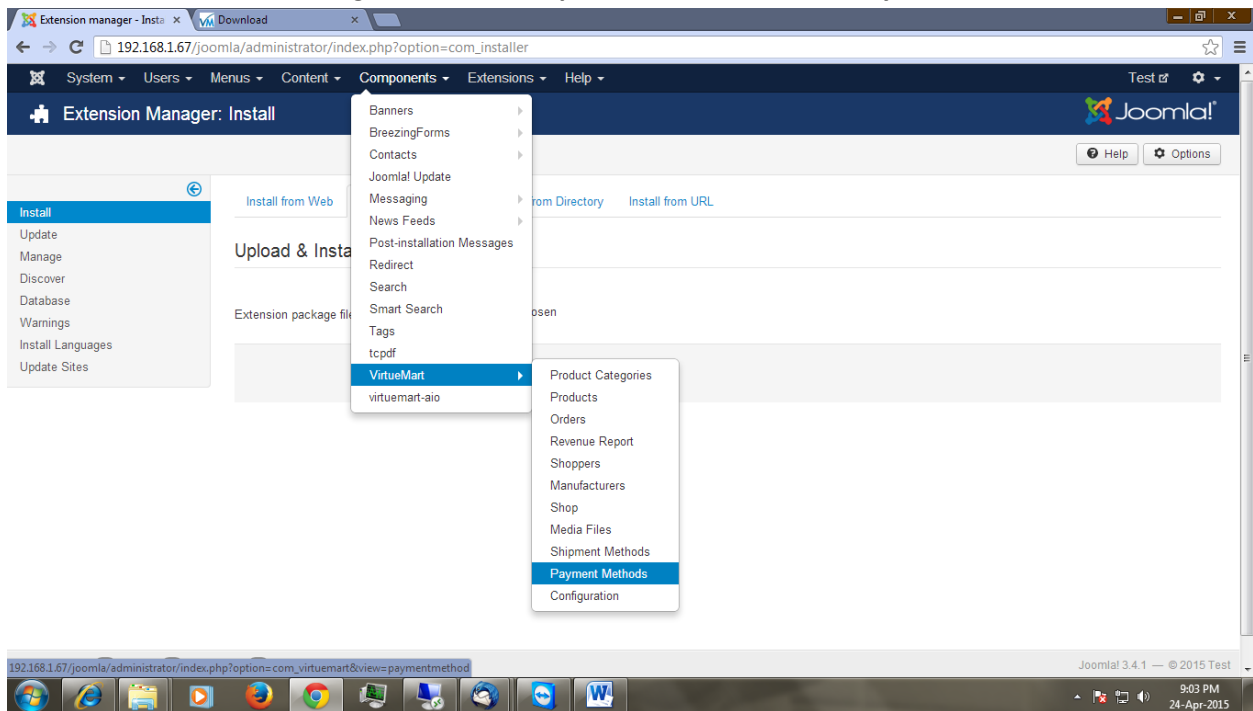

4. Click on **Choose File**, select the provided **Paynetz** zip file and select **Upload & Install**.
5. This will install the Paynetz gateway in Joomla 3.4.

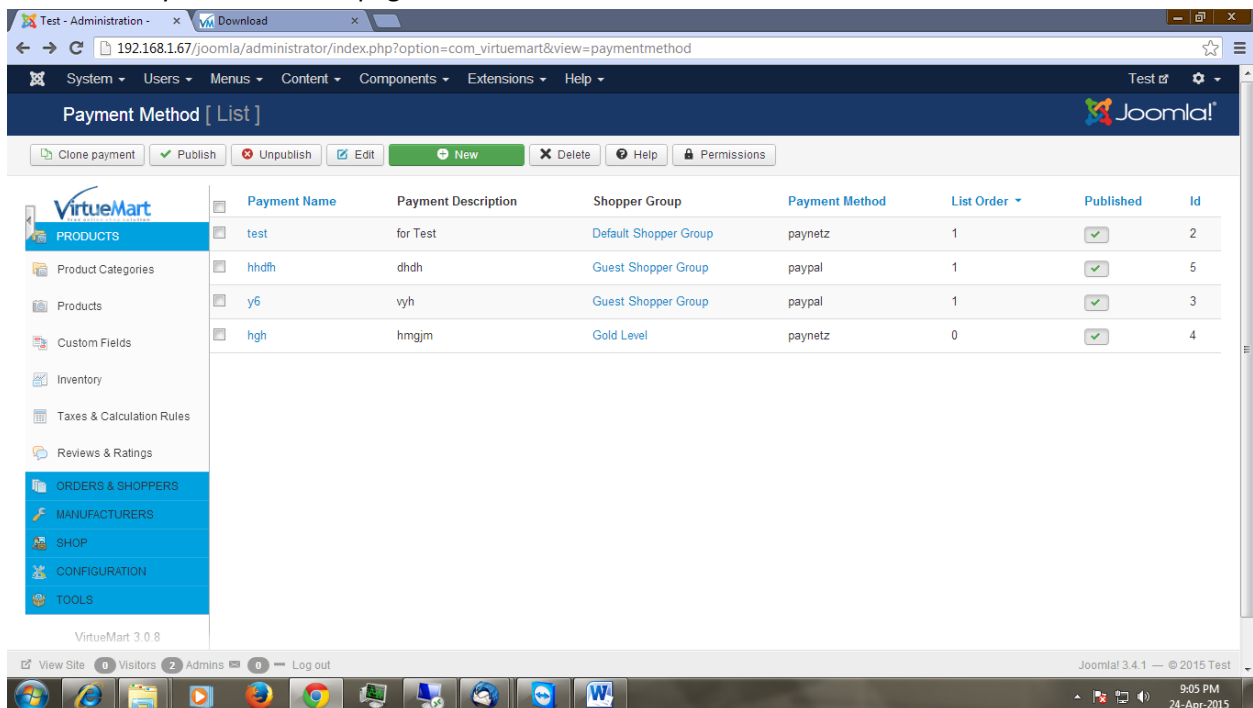

To Test this we used VirtueMart.

6. VirtueMart plugin for Joomla can be downloaded from the following URL:  
<http://virtuemart.net/download>
7. Download The VM3 – Virtuemart 3 Component. Extract the Downloaded zipped file.(It will give you 3 more zipped files.)
8. On the Joomla Site manager. Click on Extension Manager under **Extensions**. On the Next page click on the **Upload Package File** tab.(Same as Step 2 & 3)
9. Click on **Choose File** select the file : com\_virtuemart.3.0.8.zip and select **Upload & Install**.
10. Follow same process as step 8. Click on **Choose File** select the file : com\_virtuemart.3.0.8\_ext\_aio.zip and select **Upload & Install**.

11. On the Joomla Site manager. Click on **Components > VirtueMart > Payment Methods**.

12. On the Payment Methods page select **NEW** button.

On the next page the details of the Payment Mode can be entered.

The screenshot shows the Joomla! administrator interface for adding a new payment method. The browser address bar shows the URL: 192.168.1.67/joomla/administrator/index.php. The page title is 'Payment Method [ New ]'. The left sidebar contains a menu with categories like PRODUCTS, ORDERS & SHOPPERS, MANUFACTURERS, SHOP, CONFIGURATION, and TOOLS. The main content area has two tabs: 'Payment Method Information' and 'Configuration'. The 'Payment Method Information' tab is active, showing a form with the following fields: Payment Name, Sef Alias, Published (radio buttons for No and Yes), Payment Description, Payment Method (a dropdown menu currently showing 'Paynetz'), Shopper Group (a text field with 'Available for all'), and List Order. At the bottom of the page, there is a status bar showing 'Joomla! 3.4.1' and '© 2015 Test'.

12. Here the text fields can be entered and on the **Payment Method** option select **Paynetz** and click on **Save**.

13. Once saved it will give a success message and return the same page. Now the user can select the **Configuration** tab.

14. This will show the following page where the fields for the payment can be entered:

The screenshot shows the Joomla! administrator interface for editing an existing payment method. The browser address bar shows the URL: 192.168.1.67/joomla/administrator/index.php?option=com\_virtuemart&view=paymentmethod&task=edit&cid[]=6. The page title is 'Payment Method [ Edit ]'. The left sidebar is the same as in the previous screenshot. The main content area has two tabs: 'Payment Method Information' and 'Configuration'. The 'Configuration' tab is active, showing a success message 'Message: Payment Method successfully saved'. Below the message, the form displays the following information: 'dsgfhg' (Payment Method name), 'Payment Method: paynetz', 'PayNetz payment plugin', and 'Pay by Credit/Debit Card and Net Banking'. The form includes fields for Merchant URL, Port, Login ID, Password, and Product ID. At the bottom of the page, there is a status bar showing 'Joomla! 3.4.1' and '© 2015 Test'.

15. After entering the Payment Details, Click on save.
